About Me

I am a self-motivated, detail-oriented, and passionate learner with professional experience in forum moderation, credit unions, contact centers, and college technology centers looking to say "Hello World!" to a career in Web Development. While preferring to use the MERN stack, my interest lies in learning as much as possible to break into an entry level position in the field, whether Front End, Back End, or both.

Experience

Clearlink: Digital CX Community Forum Moderator

Being contracted by Google, my particular product was the Google Chromecast. Responsibilities included triaging new posts, responding and troubleshooting, filing bugs with Google, and keeping up-to-date on all Made By Google products. Other responsibilities for Clearlink specifically would be reporting forum analytics and developing a brand pitch for future forum teams.

Snow College: TLC Technologist

Using the LMS (Learning Management System) Canvas, the Teaching and Learning Center uses UI/UX design, HTML, and CSS to help professors create online classrooms and courses. Resources the TLC would take advantage of include Adobe Suite, Microsoft Office, and Canvas external tools such as Cisco WebEx and LockDown Browser.

American United Federal Credit Union: Contact Center Agent

Taking charge of the majority of the credit union's call volume. Duties involved assisting members with their transactions, answering questions regarding their account, sending out wires and ACHs, encouraging members to take advantage of various loan options, and helping unlock their online banking account or change their online banking information.

Skills

Certifications

- TestOut Network Pro
- StudioWeb HTML5, CSS3, JavaScript Foundations
- StudioWeb PHP 7 Foundations
- StudioWeb Python 3 Foundations

Technologies

Bootstrap, SCSS, Figma, GIMP, React, Redux, Redux Toolkit, EJS, Node.js, Node Package Manager, Express, MongoDB, SQL, MySQL, VS Code, cPanel, Git, GitHub, Netlify, Heroku, Windows, Linux, Terminal
